

CONCRETA

design Sara Moroni 2021

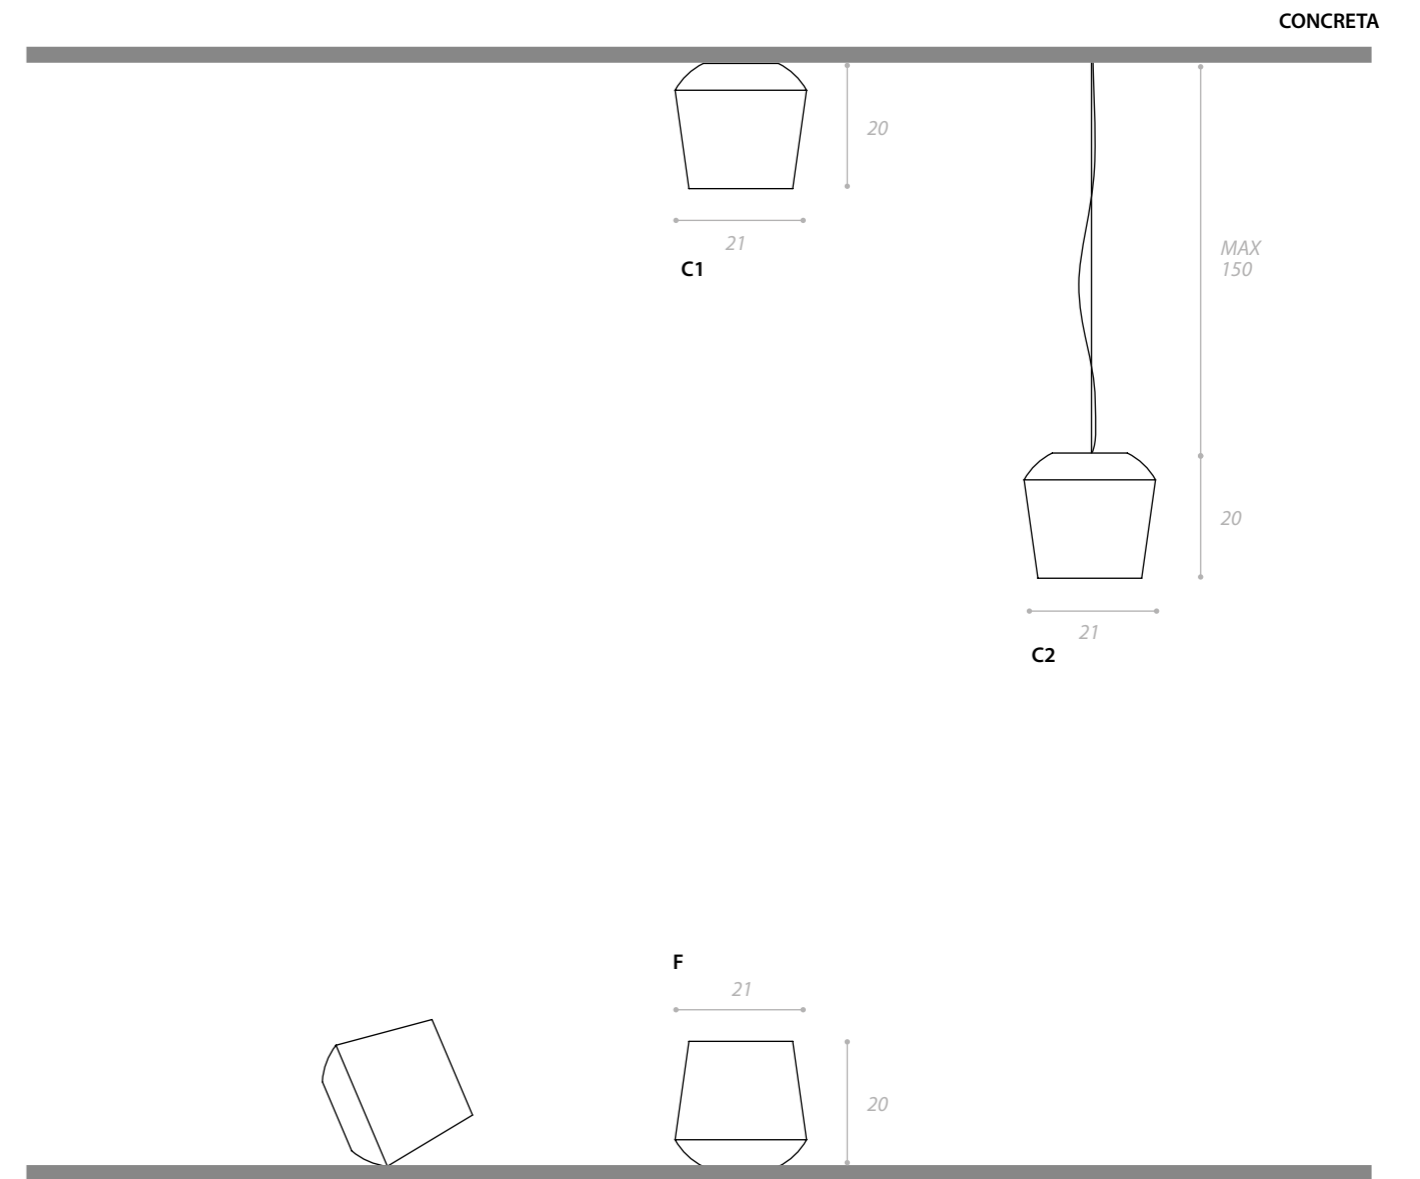

Monolite in cemento colato per gravità, ospita all'interno la fonte luminosa: una luce morbida per evidenziare superfici, vegetazione, percorsi. La forma, la materia e le colorazioni ottenute in 'massa', permettono a Concreta inserimenti in contesti diversi, rispettando natura e architettura.

Monolith in gravity-cast concrete, it houses the light source inside: a soft light to detect surfaces, vegetation, paths. The shape, the material and the colors found in the 'mass' allow a concrete insertion in different contexts, respecting nature and architecture.
